SUPPLEMENTAL DECLARATION OF APPLICANTS UNDER 37 C.F.R. § 1.132

Sir:

The undersigned declare, under penalty of perjury under the laws of the United States of America, that the following is true and correct and that each of us has personal knowledge of the matters set forth in this Supplemental Declaration and, if called upon to testify, could competently testify thereto. This is a continuation of the Declaration of Applicants under 37 C.F.R. § 132, filed October 9, 2003. The following paragraphs are numbered in sequence from those of the prior Declaration.

7. Groups of engineers of MEI, SanDisk and Toshiba worked both separately within their individual companies and together in joint discussions to develop specifications for the SD Memory Card that are expressed in the SD Specification 1.0. We were part of the group of engineers from SanDisk.

Attorney Docket No.: SNDK.158US0

Application No.: 09/641,023

8. During the period of development of the SD Memory Card, it was important to us at SanDisk that the SD Memory Card be backward-compatible with the existing MultiMediaCard ("MMC") because SanDisk participated in defining that that standard and sold MMC memory cards as a product. The MMC card is specified in the "MultiMediaCard System Specification Version 2.11," ("MMC Specification") which we understand has already been submitted to the U.S. Patent and Trademark Office in connection with the Present Application. We wanted the MMC card to continue to be useable in systems designed for the SD Memory Card. Portions of the SD Specification 1.0 therefore include material from the MMC Specification. This backward compatibility with the MMC card was not of such concern to the other 3C companies. The subject matter claimed in the Present Application was conceived by us and formed part of SanDisk's contribution to the SD Specification 1.0 with a purpose of providing such backward-compatibility.

9. We note that the Office Action dated December 4, 2003 rejected claims 1-20 and 24-32 of the Present Application as anticipated by the SD Specification 1.0, with specific reference to the following portions: sections 3 (particularly section 3.1.1), 4.3.1, 4.4 and 5; and pages 20, 44, 108 and 114. Descriptions in these specifically referenced portions of subject matter claimed in the Present Application are either descriptions by us, or derived from us, of subject matter conceived solely by us.

10. Yosi Pinto additionally declares: I was the principal writer of the SD Specification 1.0. I wrote the SD Specification 1.0 to include our contributions, those of other engineers within the group from SanDisk and of engineers within the groups of engineers from MEI and Toshiba, as well as including material from the MMC Specification.

Each of us declares that all statements made herein of our own knowledge are true, all statements made herein on information and belief are believed to be true, and all statements are made herein with the knowledge that, in any document to be filed in the United States Patent and Trademark Office, willful false statements and the like are punishable, including fine or imprisonment or both, as set forth in 18 U.S.C. § 1001, and may jeopardize the validity of the Present Application and any patent issuing therefrom.

Executed this 3 day of March 2004, in Sunnyvale, California.
